

Localizing Your Device

You will be prompted to select the device language after completing the Quick Start Wizard.

Select the device language

When the Choose language to install screen appears, select a language on the list, then tap **Install**. The selected language is installed on your device. Do not turn off or reset your device. It will restart automatically after the installation is completed.

Install a software keyboard

1. On the Home screen, tap **Start > Settings > System** tab > **Sunnysoft InterWrite > Keyboard** tab, then tap **Add**.
2. Select the software keyboard language and layout on the list, then tap **OK**.

Tip While typing, tap the **Input Selector arrow > Other Input Methods** to access the installed software keyboard layouts.

Turn off the device localization

1. On the Home screen, tap **Start > Settings > System** tab > **Sunnysoft InterWrite > General** tab.
2. Clear the **Turn on system localization** checkbox, then tap **OK**. The device returns to its default language setting.

Note The device needs to restart when the **Turn on system localization** option is enabled or disabled.
